## My Role

I strive to deliver quality front-end code that drives a streamlined and intuitive user experience. I have always rapidly built my skill set to meet any challenge.

## My Experience & Skills

I have been working with professional design & development teams for over 10 years. Through constant education and experience I've come to excel in:

- Angular / Node / MongoDB
- HTML5 / CSS3 / Javascript / jQuery
- SASS / LESS / BEM
- Grunt / Gulp
- REST / AJAX / JSON
- Responsive / Mobile-First
- UI/UX Design / Adobe CS
- LAMP Stack
- Relational DB / Normalization / Optimization
- eCommerce Development
- Payment APIs (Paypal, Auth.net, Stripe)
- CMS (Wordpress / Drupal / Joomla)

## Work History

### UI Developer - HealthWyse LLC - Wilmington, MA - December 2014 to Present

At Healthwyse I develop reusable UI components and application logic utilizing the AngularJS Framework on the web as well as in native Windows, iOS & Android apps. Technologies I utilize on a daily basis include Angular, Bootstrap, Node, Gulp, Underscore/Lodash, SASS, CSS3 & HTML5. I research, employ and encourage Javascript, CSS, Angular & UI/UX best practices and participate in code reviews with a team of developers, architects, QA testers & managers in an Agile environment. I also spearhead project UI/UX design, ensuring we deliver a polished, user-friendly experience.

### UI Engineer - American Tower Corporation - Woburn, MA - April 2014 to December 2014

At American Tower I developed and maintained the front-end/UI of internal and customer-facing applications. Utilizing expert knowledge of front-end development technologies and techniques such as HTML5, CSS3, Javascript, jQuery & AJAX I collaborated with a team of developers, UX designers and product managers improving and enhancing the user experience of enterprise-grade Java/Oracle/ADF web applications and the public-facing corporate website.

### Lead Developer - MESH Interactive Agency - Nashua, NH - July 2013 to April 2014

At MESH I spearheaded development strategy/implementation, lead a team of developers and collaborated with a cross-functional management, design and marketing team. I monitored the high-level of projects to ensure timely delivery. I also developed responsive websites, mobile apps and large-scale web applications for a national and international client base. This entailed writing front-end HTML5/CSS3/ Javascript/jQuery/AJAX and implementing back end functionality with Wordpress & open-source frameworks as well as custom PHP and MySQL databases.

### Senior Web Developer - smith&jones idea agency - Sturbridge, MA - November 2012 to July 2013

At smith&jones I designed, developed and maintained mobile-first web sites, web applications, mobile apps and multimedia marketing & advertising assets utilizing the latest web development techniques, frameworks & libraries, including Wordpress, Drupal, jQuery (UI + Mobile), LESS/SASS.

### Art Director/Web Developer - ARRCO Medical Advertising - Norwood, MA Oct 2005 to Nov 2012

I worked on a broad spectrum of projects involving branding, print advertising & marketing collateral campaign development as well as website design & development. I satisfied a national & international client base with strict branding and quality standards.

## Education

Tri-County RVTHS - Franklin, MA - Trade Certificate in Graphic Design
